Alliance School Students Visit The GHV Embankment Greenway

Students from the Urban Education Alliance are now able to enjoy learning at the recently completed GHV Embankment Greenway. With its Terrace Garden and Pollinator Prairie Habitat, the Greenway is one of the cornerstones of the Green House Venture Campus, which will eventually include

Emily Morris from Saint Louis University helps student identify native plants and bees.

Scott Woodbury from Shaw Nature Reserve asks students questions about the GHV Embankment Greenway.

a state-of-the-art Education Center.

Alliance schools include: Tower Grove Christian Academy, St. Margaret of Scotland School, Mullanphy Investigative Learning Center, and St. Louis Language Immersion School.

Using the Embankment Greenway as a showcase, educators help students understand the mutually crucial connection between native Missouri plants and pollinating bees and butterflies.

The Green House Venture
To educate, excite, and equip an inclusive population of elementary students to pursue a sustainable world through a hands-on program in bio-science and urban agriculture

Rick Kacenski Rick Kacenski from DTLS talks about Missouri native plants with students as they walk along the GHV Embankment Greenway.

Students use laminated sheets with illustrations to guide them in their search for native flowering plants. Later, the talk with educators to answer questions and chat about what they have seen and learned about plants and pollinators.

Tom Purcell President of The Green House Venture hands out refreshment to students as they walk back to school
